Custom Synthesis, Manufacturing and Packaging

Our customers utilize our custom manufacturing and packaging services to exceed the most demanding applications in the biotechnology field. From high purity custom packaged reagents, custom sterile solutions and specialty biochemicals to technical consultation on a variety of processes and product applications, the customer always wins. Customers ask NBC for out-sourcing of custom synthesized materials from bench scale to production scale levels, a value beyond the price!

Clients utilize our custom synthesis services to exceed the most demanding applications in the biotechnology field. From high purity custom synthesized reagents, custom sterile solutions and specialty biochemicals to technical consultation on a variety of processes and product applications, the customer always wins. Customers utilize NBC for out-sourcing of custom synthesized materials from bench scale to production scale levels, a value beyond the price!

NBC performs R&D process development, bench scale, pilot plant and small bulk manufacturing on concepts devised by our clients. NBC is flexible and responsive in our problem solving approach and provides personal attention to our clients.

Clients save time and money when they out-source process development, because their in-house development times and expenses decrease. NBC's chemists and engineers have decades of experience in chemical manufacturing and in designing technical packages that facilitate technology transfer of a process or product to commercial scale production.

NBC offers a wide range of services directly or through our network of affiliated companies that perform a variety of technical functions ensuring that customer's needs can be met on any project we undertake.

NBC offers an intelligent and economical means of custom synthesis, manufacturing, and technology development.
